**Note: Vertical reinforcing bars and clips are only included and needed on models 907 through 911.**

FIGURE 1

FRONT VIEW

- Fasten aluminum insect screen to inside of rough opening. Set the louver at the desired pitch.
- Place long reinforcing bar under top center of mounting flange. Cut off reinforcing bar where it meets top of bottom mounting flange.
- Using clips provided, attach reinforcing bar to louver blades on front of louver as shown in figure 2. Place the two shorter bars as shown in figure 1, using the same procedures as with the long bar.
