

Lomanco® Omni Solar Vent™ (OSV-40)

Fan Blade Replacement Instructions

Tools Required:

- 1/8" Allen wrench

Working from the inside of your attic or air space:

- 1. Disable vent operation.** Disconnect the solar panel wires from the wire coming from the vent.
- 2. Remove fan blade.** Locate the set screw on the side of the fan blade hub facing the attic space. Using a 1/8" Allen wrench, loosen the set screw and remove the fan blade.
- 3. Replace fan blade.** Line the set screw up with the flat on the motor shaft. Slide the fan blade onto the shaft until the hub is flush with the end of the shaft. Tighten the set screw to secure the fan blade.
- 4. Reconnect vent.** Connect the red solar panel wire to the red motor wire, and then connect the black solar panel wire to the black motor wire. **WARNING:** The unit will begin operation once the connection is made.
